

AHSAN AFZAL

MERN Stack Developer

imahsan000@gmail.com | +92 349 3082202 | Gujrat, Pakistan | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven MERN Stack Developer with hands-on, production experience across the full development lifecycle — from database schema design to polished, responsive UI. Builds scalable web applications with React.js, Next.js, Node.js, Express.js, and MongoDB, backed by secure REST APIs and JWT-based authentication. Professional experience spans AI-powered platforms, on-demand service marketplaces, and hiring/training platforms, alongside an independently designed and launched gaming marketplace. Actively integrates AI coding assistants — GitHub Copilot, Cursor, Claude, and ChatGPT — and prompt engineering into daily workflow to ship faster without sacrificing code quality. Currently building client-facing applications and internal tools as a MERN Stack Developer at NextPak Agile Solutions, while completing a BS in Computer Science.

TECHNICAL SKILLS

Frontend: React.js • Next.js • JavaScript (ES6+) • TypeScript • HTML5 • CSS3 • Tailwind CSS • Bootstrap • Material UI

Backend & APIs: Node.js • Express.js • REST API Design • JWT Authentication

Database: MongoDB • Firebase

State Management: Redux Toolkit • React Query

AI & Prompt Engineering: ChatGPT • Claude • GitHub Copilot • Cursor • Kiro • Antigravity • Prompt Engineering • AI-Assisted Debugging • AI-Assisted Code Generation

Tools & Practices: Git • GitHub • Postman • VS Code • Responsive Design • Performance Optimization

EXPERIENCE

MERN Stack Developer — *NextPak Agile Solutions* March 2025 – Present

- Architect and build full-stack applications end-to-end — from MongoDB schema design through REST API development to responsive React/Next.js interfaces — for client products including an AI-powered customer engagement platform (NextAssist AI), an on-demand services marketplace (Tealpot), and an AI hiring platform (Nexa).
- Design and implement secure JWT-based authentication and authorization flows to protect application routes, user sessions, and sensitive data.
- Build admin dashboards and internal tools that give non-technical teams control over application data, users, and content.
- Diagnose and resolve full-stack bugs and refactor existing codebases to improve performance, maintainability, reusability, and UI consistency.
- Collaborate cross-functionally in an agile environment, using Git-based workflows for version control and peer code review.
- Integrate AI coding assistants and AI-native IDEs — GitHub Copilot, Cursor, Kiro, Antigravity, ChatGPT, and Claude — with prompt engineering techniques to accelerate feature delivery, debugging, and documentation.

PROJECTS

Personal Project

Lord's Hub — Gaming Marketplace Platform | *Founder & Developer*

Live: lordshub.com

Independently conceived, designed, and built a full-stack marketplace for buying and selling verified Lords Mobile accounts, gems, diamonds, and automated bot services (war, rein, KVK, and farm/bank bots). Built with a React/Next.js frontend and backend

services covering listings, accounts, transactions, and live chat — owned end-to-end from architecture to deployment, separate from client and employer work.

Professional Projects — NextPak Agile Solutions (client work, built as part of the development team)

NextAssist AI | nextassistai.nextpak.org

AI-powered virtual employee that qualifies leads, books appointments, and delivers 24/7 customer support across web chat, WhatsApp, Messenger, Instagram, and phone. Built with Next.js.

Nexa | trynexa.com

AI-powered hiring and training platform that helps companies source, screen, and evaluate candidates through resume parsing and AI-driven job-fit scoring. Built responsive React.js interfaces integrated with backend APIs.

Tealpot | tealpot.com

On-demand services marketplace connecting customers with vetted local professionals for short-term jobs — covering service listings, work orders, and secure hiring. Built with Next.js.

Vootee | vootee.com

Next.js-based client platform focused on performance, SEO-friendly rendering, and clean, reusable component architecture.

EDUCATION

Bachelor of Science, Computer Science (Information Technology) — *Virtual University of Pakistan* Aug 2023 – Aug 2027
