

AHSAN AFZAL

MERN Stack Developer

imahsan000@gmail.com | +92 349 3082202 | Gujrat, Pakistan | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven MERN Stack Developer with hands-on experience building scalable, production-ready web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in designing and consuming REST APIs, implementing secure JWT-based authentication, and delivering responsive, performance-optimized interfaces with React and Next.js. Actively integrates AI-powered tools and prompt engineering into the development workflow to accelerate coding, debugging, and documentation. Comfortable working across the full stack — from database schema design to polished UI — with a strong focus on clean code, reusable architecture, and collaborative, agile delivery. Currently contributing as a MERN Stack Developer at NextPak Agile Solutions, building client-facing applications and internal tools end to end.

TECHNICAL SKILLS

Frontend: React.js • Next.js • JavaScript • TypeScript • HTML5 • CSS3 • Tailwind CSS • Bootstrap • Material UI

Backend: Node.js • Express.js

Database: MongoDB • Firebase

Tools: Git • GitHub • Postman • VS Code

AI & Prompt Engineering: ChatGPT • Claude • GitHub Copilot • Cursor • Kiro • Antigravity • Prompt Engineering • AI-Assisted Debugging • AI-Assisted Code Generation

Other: REST APIs • JWT Authentication • Redux Toolkit • React Query • Responsive Design • Performance Optimization

EXPERIENCE

MERN Stack Developer — NextPak Agile Solutions

March 2025 – Present

- Build and maintain scalable full-stack web applications using React.js, Node.js, Express.js, and MongoDB, covering everything from database schema to UI.
- Design and develop REST APIs and integrate them across frontend and backend systems to power core product features.
- Implement secure authentication and authorization flows using JWT to protect application routes and user data.
- Develop admin dashboards and internal tools for managing application data, users, and content.
- Manage MongoDB database design, queries, and data modeling to support application functionality and performance.
- Diagnose and resolve bugs across the stack, improving component reusability and reducing development time on client projects.
- Collaborate with cross-functional teams in an agile environment, using Git workflows for version control and code review.
- Refactor and optimize existing codebases to improve performance, maintainability, and UI consistency.
- Leverage AI coding assistants and AI-native IDEs (GitHub Copilot, Cursor, Kiro, Antigravity, ChatGPT, Claude) along with prompt engineering techniques to speed up feature development, debugging, and code documentation.

PROJECTS

Lords Hub [Gaming Marketplace](#)

Full-stack gaming marketplace platform enabling users to browse, list, and transact in-game items and accounts, with a React frontend and backend services handling listings, users, and transactions.

github.com/iahsan71/lordshub-customer

Nexa [NextPak Agile Solutions](#)

Client web application built with React, focused on responsive UI and integration with backend APIs to deliver a smooth, production-ready user experience.

github.com/VIRGO96/nexa-react

Vootee [NextPak Agile Solutions](#)

Next.js-based client platform emphasizing performance, SEO-friendly rendering, and clean, reusable component architecture.
github.com/VIRGO96/vootee-next-main

EDUCATION

Bachelor of Science, Computer Science (Information Technology)

Aug 2023 – Aug 2027

Virtual University of Pakistan
